

ARVEX Operations

Medical Office and Outpatient Capability Statement

Facility Operations and Environmental Services | Veteran-Owned Company

Company overview

ARVEX Operations LLC is a Central Florida veteran-owned company developing environmental cleaning programs for medical offices and outpatient support areas. Services are planned around patient-facing spaces, operating hours, approved procedures and accountable local supervision.

Services available by agreed scope

- Waiting-room, administrative and agreed examination support areas
- Restroom and high-touch surface cleaning
- Customer-approved floor and carpet care
- Day porter and supply replenishment support
- Inspections, corrective action and contamination escalation

Operating approach

Named local management contact • Defined tasks and frequencies • Planned backup coverage • Documented inspections and correction ownership • Growth matched to staffing and funding

Leadership and development

Led by Raymond A. Negron, Principal and CEO, a retired U.S. Army LTC with plans, operations and training experience and more than eight years of healthcare executive experience. Autonomous cleaning is a planned enhancement subject to site assessment, qualified partners and customer approval.

Customer focus

Medical-office properties, physician practices, outpatient support areas and healthcare administrative facilities.

Acute-care terminal cleaning, sharps, regulated medical waste and blood cleanup require a separately qualified scope. Services follow approved customer protocols and product instructions; no clinical outcome is guaranteed.
